WORK EXPERIENCE

Mu-Sigma

Trainee Decision Scientist

Bangalore, Karnataka

November 2016 - Present

Projects

- *Worked with the Marketing team of a major tech company to redesign their customer offerings*
 - The marketing team wanted to identify the standard packages that can be modified to direct the sales through the standard offerings
 - Identified the key packages, that should be modified, in order to match the demand patterns observed from the historical sales
 - Global impact of the suggested modifications was analyzed, and a report was created to enable the Business stakeholders take decisions
- *Worked with a major e-retailer brand, and provided analysis reports to facilitate decision making*
 - Worked on many short term Adhoc Analysis Projects to help solve Business Questions
 - Communicated with the business stakeholders on daily basis to get the requirements for the Analysis
 - The end results of the analysis were provided as a excel files with detailed descriptive analysis based on the business requirements
- *Created a MS-Excel Report Automation Framework, for a major e-retailer brand to help automate existing excel reports*
 - Identified the need for a framework, that would be utilized to automate existing Ms-excel reports
 - Communicated with the people handling different reports, to design a full scope for the framework
 - Created the Excel Automation framework in Python, that enabled the report owners to automate their existing reports without writing a single piece of Python code
